NOTATIONS

$\mathbb{F}_q$	Finite field of size q
$\mathbb{F}_q^*$	Multiplicative group of $\mathbb{F}_q$
$\mathbb{Z}_m$	residue class of m
$\mathbb{N}$	Set of natural numbers
$[n]$	The set $\{1, 2, \dots, n\}$
$\emptyset$	Empty set
$X \sim \mathcal{D}$	Random variable X having distribution $\mathcal{D}$
$\Delta(\cdot, \cdot)$	Relative Hamming distance
$\mathbb{E}[X]$	Expectation of random variable X
$\mathbb{D}[X]$	Variance of random variable X
$\mathbf{w}(l)$	l -th coordinate of $\mathbf{w} \in \mathbb{F}_q^n$
D -evaluation of h over D	Vector of values of h at all points of D
$\text{Unif}(S)$	Uniform distribution over the set S
q	A prime power, unless stated otherwise
$g^{\mathbf{w}}$	$(g^{\mathbf{w}(1)}, \dots, g^{\mathbf{w}(n)})$
$M_{\mathbf{w}, \mathbf{v}}$	$\{g^{\mathbf{w} + \lambda \mathbf{v}} \mid \lambda \in \mathbb{Z}_m\}$
$\text{mon}_{\mathbf{u}}(z_1, \dots, z_n)$	$\prod_{\ell} z_{\ell}^{\mathbf{u}(\ell)}$ in $\mathbb{F}_q[z_1, \dots, z_n] / (z_1^m - 1, \dots, z_n^m - 1)$

$\langle \mathbf{u}, \mathbf{v} \rangle$	Inner product of vectors $\mathbf{u}$ and $\mathbf{v}$
$\text{supp}(h(y))$	$\{e \in \mathbb{N}_{\geq 0} : y^e \text{ has positive coefficient in } h\}$
b -bounded set	Every element of the set ($\subseteq \mathbb{R}$) is less than b
$\text{agr}(e, M)$	Number of agreements of M -evaluation of F and C_m -evaluation of h
$\text{weight}(e, M)$	$\max\{\text{agr}(e, M) : h \in \mathbb{F}[y], h(0) = e, \text{supp}(h) \subseteq S \cup \{0\}\}$
$A \otimes B$	Kronecker product of A and B
$A \odot B$	Hadamard Product of A and B
$\ \mathbf{a}\ $	Hamming weight of $\mathbf{a}$

CHAPTER 1

SPARSE POLYNOMIAL INTERPOLATION

We shall discuss the paper [BOT88] here.

Definition 1.1 (Sparse Polynomial). We call a polynomial $P \in A[x_1, \dots, x_n]$ *t-sparse* if it has at most t -many monomials with non-zero coefficient in P .

The main problem of concern for this chapter is the following:

Problem 1.2. How many evaluations are needed to interpolate a t -sparse polynomial P deterministically, if we have the A^n -evaluation of P ?
